SQL | Subqueries exercise | Show countries with more than 8 events, using a subquery

(https://www.wiseowl.co.uk/sql/exercises/standard/subqueries/4133/)

Write a query which lists out countries which have more than 8 events, using a correlated subquery rather than **HAVING**.

```sql
select CountryName from [dbo].[tblCountry]
where CountryID in
    (select CountryID from [dbo].[tblEvent]
    group by CountryID
    having count(CountryID) > 8
    )
order by CountryName
```

	CountryName
1	France
2	International
3	Space
4	United Kingdom
5	United States
